

LEWES HEARING

Local hearing assessment and the latest hearing aid technology

Do You Think You May Have a Hearing Loss ?

Hearing loss usually follows a gradual decline and can be a normal part of the ageing process. Common signs could be struggling to hear speech clearly in background noise, or needing to turn up the TV.

It is important to look after your hearing as you would any other aspect of your health.

Why Not Book a FREE Hearing Assessment ?

A professional hearing assessment in your home takes around 1 hour and is free of charge or obligation. The assessment includes a full medical case history, ear examination and hearing test using the latest technology. The results are then explained in detail, medical referrals made if necessary, and suitable hearing aid products discussed.

Who Uses My Services ?

Patients come to me who require a personal home hearing service and the very latest discreet private hearing instruments. They are also looking for a local, fully independent and professional fitting and aftercare service in their home, avoiding NHS waiting lists and travel concerns. Many of my patients are direct recommendations and I have steadily built a loyal patient base in the local area.
